

Aerial-Delivered Firefighter Jason A. Ramos

**INNOVATIVE OUTREACH.
ENGAGING PARTNERSHIPS.
TRANSFORMATIVE OUTCOMES.**

Fire Safety from the Perspective of an Aerial-Delivered Firefighter

Jason A. Ramos started his wildland firefighting career in the Inland Empire (Riverside County). After several years, he wanted to work with the best of the best and joined the ranks of aerial-delivered wildland firefighters. For over two decades, he helped combat some of the most inaccessible wildfires in the United States. Aerial-delivered firefighters use helicopters and planes to provide quick responses to wildfires throughout our nation. Jason is also called upon to provide Search & Rescue drone operations to help with SAR missions in the North Cascades of Washington State.

Jason A. Ramos

- Aerial-Delivered Firefighter
- Search & Rescue Drone Team Leader
- Author of Smokejumper
- Owner of Product Research Gear

Live Online Session

Date: 10/19/2021
Time: 9:00 a.m. PST

Audience

Middle School
High School

Topics of Discussion:

- ✓ Journey into fire fighting and his elite designation as an aerial-delivered firefighter (smokejumper).
- ✓ Learn about the aerial-delivered firefighter's gear and his travel to fires by parachute, helicopter, vehicle, by foot, or whatever mode of transportation is most efficient.
- ✓ Insight into the use of drones in the fire service on wildland fires throughout our nation.
- ✓ Key insights into how to persevere and overcome life obstacles.
